**DETAILED ACTION**  
***Drawings***

1. The formal drawings are approved by the examiner.

***Title***

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2852

4. Claims 1-3, 6-8, and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Walgrove, III et al (6,580,885). The corona wire damper by Walgrove teaches a damping pad (50, 156, 158) and a pad holder (44, 154, 152) that holds the pad such that it contacts the wire (Figures 1, 5).

*Allowable Subject Matter*

5. Claims 4-5, 9-10, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
